

PICCV Running Times

All MFT actuators have constant running time of 100 seconds. Whether they are set for on/off, floating or proportional control, the running time remains constant.

Note for Floating Point Control with LRB24-3: These actuators have a constant running time. The running time is dependent on the model number or FlowSetR™ position as indicated in the table below. Some DDC controllers need an adjustment of the running time, otherwise they lose the position information. In any case, we recommend a position reset once a day.

Model # Valve	Flow Rate (GPM)	Running Time (sec.)	
		LRB24-3	LRX24-MFT, ARX24-MFT TF24-MFT US, LF24-MFT US, AF24-MFT US
PICCV-15-0.50 (-PT)	0.5	36	100
PICCV-15-001 (-PT)	1	60	100
PICCV-15-1.50 (-PT)	1.5	45	100
PICCV-15-002 (-PT)	2	51	100
